

Over 100 RSC's per Minute !!

With our: ***Rotary Slotter***

Regular Slotted Cartons: They are the bread and butter of nearly every corrugating plant in Australia. The sad part about this for the smaller players in the game, is the amount of work required for such a small return, it makes it really hard to make money! Traditionally high speed machinery has been the domain of only the big players with their million dollar converting lines. The smaller players were left to try and compete with machines that only had a fraction of the production capacity. Converta Machinery is excited to be able to present you with the 'Rotary Slotter'. Featuring: blindingly fast production speeds, Computer controlled setup and an automatic kicker feed system. You will be putting your existing production costs on RSC's where they belong... In your pocket !!

Converta Machinery

**Three different models
available**

**Unit 3, 31 - 33 Hume St
Huntingdale, Vic 3166**
